

Quite often, positioning of the flexible dies precisely onto the magnetic cylinder presents a challenge. However, using the compact aligning tool ProMount, the perfect installation of your flexible dies is made easily and quickly.

Advantages

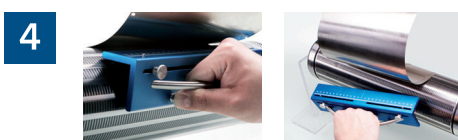

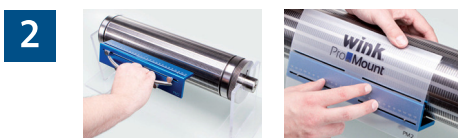

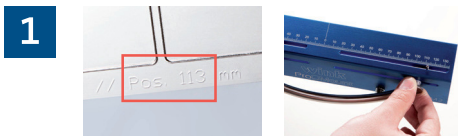

- perfect fit
- durability and robust design
- simple to use
- time savings due to rapid retooling

Sizes

7 standard types (PM 1 - 7)

- for the most common narrow web machines and working widths
- each best suited for cylinder circumferences Z-65 to Z-204 (1/8" cp)
- special sizes on request

Instructions: With ProMount it's that simple...

* ProMount fitting holes come as standard with ProShift[®] flexible dies and are available as an option for all new flexible dies.
