

# [ Magnetic carriers ]

Perfect cutting results require more than just an accurate flexible die, a precision magnetic carrier is also crucial. This is why **wink** uses state-of-the-art equipment to produce highest quality magnetic cylinders and bases in all standard sizes, as well as to individual customer specifications. Our tools are known for their precision, accuracy, quality, optimal adhesion and long lifetime.

## Design

- rotary magnetic cylinder
- magnetic flat bed bases

## Characteristics

- diameter of the cylinder  
max. 300 mm
- width of the cylinder  
max. 2000 mm  
(special sizes on request)
- high magnetic power
- high longevity
- delivered including gear

## Application

- label printing
- continuous stationary printing
- flexo printing
- offset printing
- letterpress

## Tolerances

- bearer ring:  $\pm 3 \mu\text{m}$
- magnetic area:  $\pm 3 \mu\text{m}$
- concentric running  
bearer ring:  $\pm 3 \mu\text{m}$
- concentric running  
magnetic area:  $\pm 3 \mu\text{m}$
- height tolerance (plate):  $\pm 5 \mu\text{m}$
