

MCR

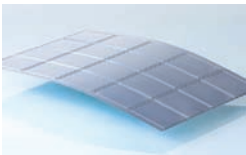

Micro Chrome

Extreme Performance

The MCR coating substantially increases the service life of your flexible dies, making it the optimum solution for abrasive materials and long runs.

You cut, we care.

FOR LONG RUNS

MCR

Micro Chrome

Die-cutting under extreme conditions

MCR Coating

Particularly in the processing of very abrasive materials and inks (thermal paper, opaque white, luminous inks) and long runs, the MCR coating offers a considerable prolongation of lifetime.

Specifications

- specially developed hard chrome composite; coating applied by galvano technique
- hardness approx. 1200 HV
- combinable with laser hardening and Non-Stick coatings (Black, Grey and White)
- no additional tolerance differences
- no impairing of the flexibility or magnetic adhesion
