EnvelopeCut

Advantages at a glance

We care for quality.

You need to manufacture products rapidly and without problems, in order to meet your customers' high expectations. We can provide you with a comprehensive portfolio of premium quality cutting tools, which are characterised by their extremely high precision and durability. State-of-the-art technology and reliable checks throughout the production process enable us to guarantee consistently high DIN ISO 9001-certified quality standards.

We care for communication.

Your normal working day is often hectic. We help you to respond flexibly to your customers' needs. It is quick and easy to get in touch with your personal, technically trained contact persons. Our friendly and helpful team with many years of experience in the industry will rapidly provide you with the necessary information and help you put your projects into practice.

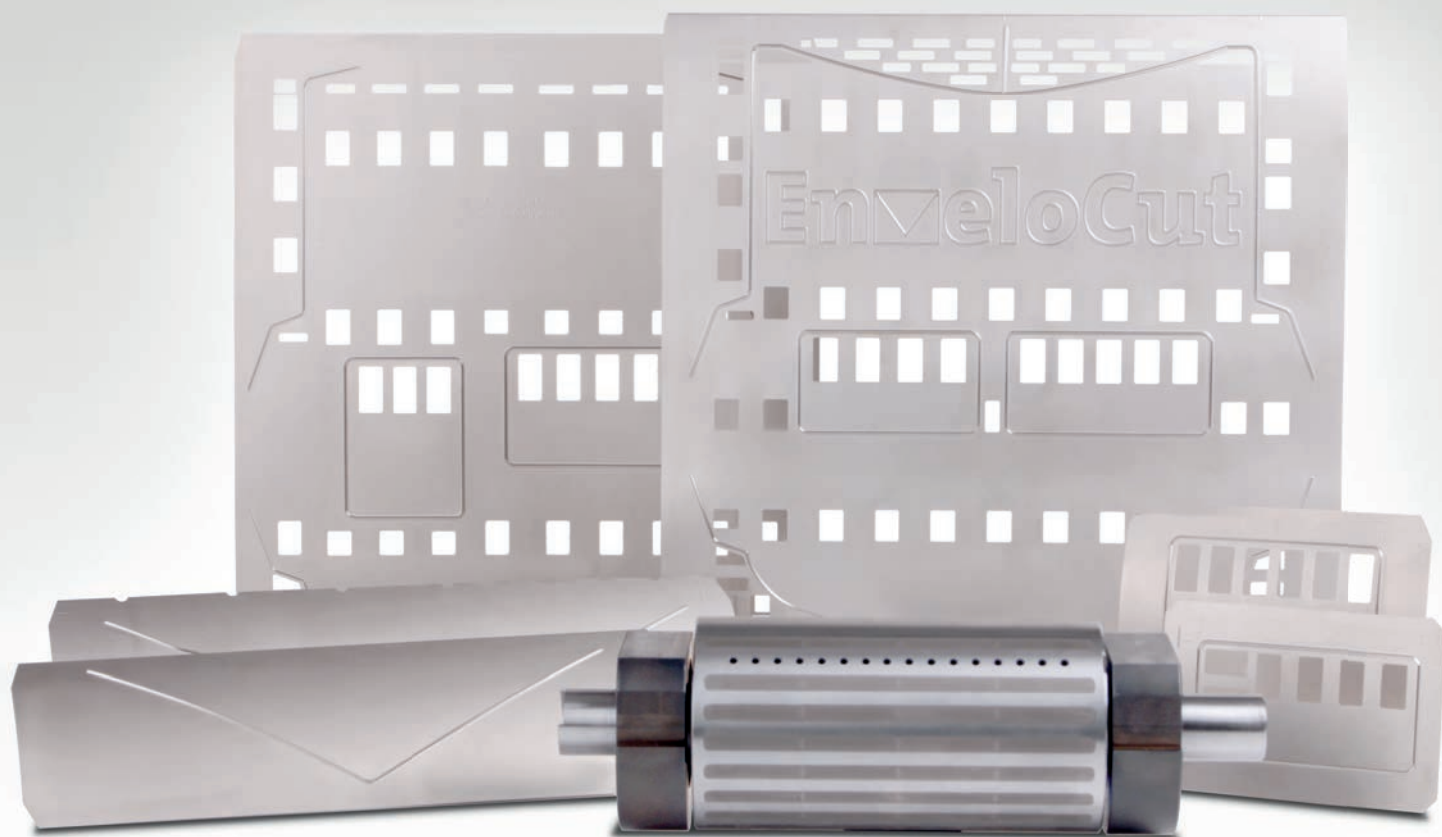

We care for solutions.

In order to be cost-effective, you need to make optimum use of your machinery. We will help you optimise your production processes by defining perfect parameters for your cutting tools, in order to prevent any time-consuming problems before they occur. Thanks to continuous investment in research and development, we are also able to offer unique product innovations that will provide you with decisive advantages for your manufacturing process.

Our motto:

You cut, we care.
